

## TECHNICAL DATA SHEET

### CHEER ELECTRIC SHOWERS

Cheer 8.5kW / 9.5kW

#### Product Specification

|                            |                                      |
|----------------------------|--------------------------------------|
| <b>Product Code:</b>       | CHE85 W / CHE95 W                    |
| <b>Finish:</b>             | White                                |
| <b>Product Type:</b>       | Contemporary                         |
| <b>Construction:</b>       | Plastic (ABS)                        |
| <b>Supply:</b>             | Suitable for mains cold feed only    |
| <b>Inlet Connections:</b>  | 15mm push fit, 5 directional options |
| <b>Outlet Connections:</b> | G ½"                                 |
| <b>Working Pressures:</b>  | Min 0.7bar, Max 10.0bar              |

#### Additional Information

- Instantaneous electric shower drawing water direct from the mains supply; ideal for installations without stored hot water and second bathrooms.
- Consistent showering temperature is provided. The temperature stabilising device compensated for changes in the water pressure caused by other household fittings.
- Safety devices include thermal cut out & pressure relief.
- 3 Power settings. (Cold, Warm/Eco, Hot) and a separate temperature control.
- On/Off is operated by a rotary dial, ensuring temperature setting remains unaffected after each use.
- Push fit swivel inlet elbow pipe connection, enabling plumbing from 5 different directions.
- This shower is supplied with an adjustable riser kit and single mode rub-clean handset, 1.5m shower hose & hose retainer.
- Adjustable riser comes complete with adjustable bottom bracket so ideal to cover existing riser holes and tile joints.
- Incorporates a temperature control device (TCD) that activates when the temperature is too high & the water inside the heater gets too hot. The TCD will switch off the power to the heating elements and once the unit cools down to a safe temperature, will come on again.
