in door opening solutions

RetroV

The easy way to update your old door closers.

- Are you looking to change your old, tired door closers?
- Do you really want to drill more holes in the door and frame?
- Worried a new door closer will impact on the performance of your fire door?

RetroV is the easy, convenient way to replace older door closers including the Briton 2003, 2003V and 2004 Series.

Instead of trying to match different old model versions for new replacements, you can now change them all for one UNION RetroV, saving you time looking for similar replacements.

Update old or tired door closers – without risking the door's fire certification

The more holes you drill in a fire door, the less resistant to fire and smoke it will be.

With RetroV, you can update old Briton models 2003, 2003V and 2004 door closers without drilling more holes in your fire door.

RetroV uses the existing holes and positions, so you can fit a new door closer in minutes without the worry of contravening the door's fire certification.

Simplify fire door maintenance

A property using a wide range of door closers will also need a wide range of replacements to look after them.

RetroV cuts out the expense and headache of holding multiple door closers. Just one door closer looks after the most common internal fire door types.

Plus, RetroV comes with a UNION 10 year guarantee – you can fit and forget.

Top reasons for installing RetroV

- Same fixing points as for Briton 2003, 2003V and 2004 Series
- Adjustable closing force power range
- UNION 10 year warranty
- CE Marked to EN 1154 as variable power 3-4
- Fire rated for timber (FD120) fire door
- Fire rated for metal (FD240) fire door
- Maximum door width 1100mm (size 4)
- Silver finish

RetroV

Easy to fit

With RetroV you can replace different models such as the Briton 2003, 2003V and 2004 Series with a single unit with no additional holes needed.

Easy to adjust power

Designed to be easy to set up just how you need it, RetroV includes a variable power adjuster - simply turn using the supplied allen key to adjust the closing force.

Fit with confidence

RetroV comes with a UNION 10 year guarantee and the quality you can expect from a British design backed with over 180 years' experience.

Great performance

Independent latching and closing valves give smooth, precise, reliable door closing control through every degree of closing.

Complementary design

The cover is carefully designed to blend in with other hardware.

Everything inside

Simple instructions, all the fixings and specialist tools are included.

Wood and metal compatible

RetroV can be installed on timber and metal doors up to 1100mm width.

Fire rated

RetroV is certified for use on fire doors and is CE Marked to EN 1154 with variable power EN 3-4 (EN 1634 pt 1 up to 120mins for timber and 240mins for steel).
